Cricket Player Performance Tracking Application : CRICKSTATS

User Story

As a Cricket Team Manager, I want to maintain and track the performance details of cricket players in Salesforce, so that I can easily analyze their performance and monitor their progress.The application will store player information such as Player Name, Age, Team, Role, Matches Played, Runs, Wickets, Batting Average, and Bowling Average. It will also maintain match-wise performance records for each player.Using Salesforce custom objects, fields, and relationships, the system will organize player and match performance data efficiently. The application will help team managers view player statistics, compare performances, generate reports, and make better decisions for team selection and player development.

1. INTRODUCTION

1.1 Project Overview:

CRICKSTATS is a Salesforce-based application developed to maintain and monitor cricket player performance records. It helps store player details and match-wise statistics in an organized manner.

The application uses custom objects, fields, relationships, reports, and dashboards to manage cricket performance data. It allows coaches and team administrators to easily view player statistics and analyze their performance.

1.2 Purpose :

The main purpose of this project is:

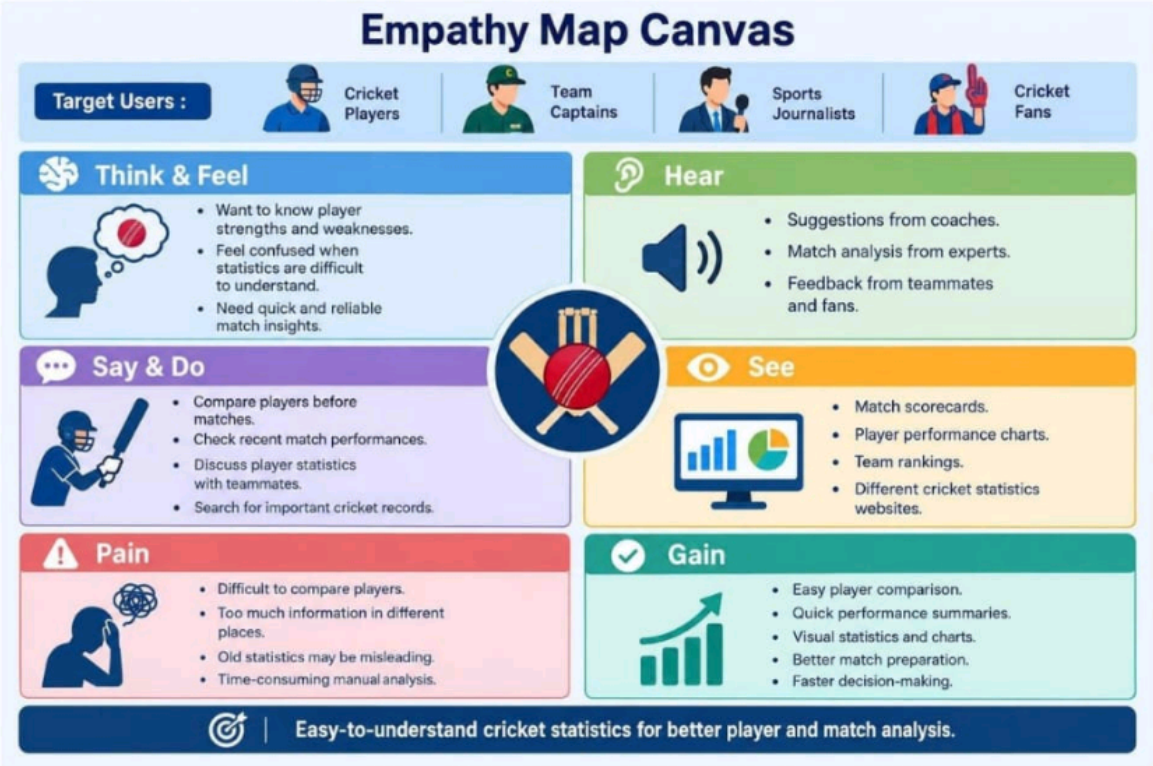

To maintain player information digitally.

To record match-wise player performance.

To track runs, wickets, matches, and other statistics.

To generate reports for performance analysis.

To help coaches and administrators manage player records efficiently.

2.3 Brainstorming

Brainstormed Ideas

Livematch score monitoring system

Playerperformance comparison tool

Automated cricket data collection system

Interactive team analysis dashboard

Cricketplayer ranking system

Selected Idea:

Requirements

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-read dashboards
- Minimal learning curve

Examples:

- A new coach should be able to:
- Log in
- Enter match data
- View player reports
- within a few minutes without special training.

Example: The Salesforce Lightning interface provides drag-and-drop dashboards and user-friendly forms.

NFR-2: Security

The system must protect sensitive player data from unauthorized access.

Requirements

- Role-based access control
- Secure authentication
- Encrypted data storage
- Regular backups

Examples:

- Coaches can view player statistics
- Managers can edit records
- Analysts can generate reports
- Only admins can modify system settings

Example: Salesforce Profiles and Permission Sets restrict access to confidential information.

NFR-3: Reliability

- 24/7 system availability
- Minimal downtime
- Cloud-based access
- Disaster recovery

Example:

Coaches should be able to access CRICKSTATS even during tournaments at night or on weekends.

Salesforce provides high uptime with cloud hosting.

NFR-6: Scalability

The system should support increasing numbers of users, players, and records.
Requirements

- Handle growing datasets
- Support more teams and leagues
- Expand storage capacity
- Maintain performance under load

Example:

If CRICKSTATS is extended from one team to 50 teams, the system should still perform smoothly.

Salesforce cloud infrastructure automatically scales storage and processing.

3.3 Data Flow Diagram

Data Flow

User →Salesforce UI → Player Object → Match Performance → Reports → Dashboard

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	Member4
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	Member2
Sprint-2	Automation	USN-7	As a system, I want to validate player and match inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-8	As a system, I want automated flows to update player statistics so that performance data remains accurate.	5	High	Member1

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account
Milestone 2 : Object Creation
Milestone 3 : Tabs
Milestone 4 : The Lightning App
Milestone 5 : Fields & Relationships
Milestone 6 : Roll-up Summary
Milestone 7 : Flows

Implementation

Milestone 1 - Salesforce developer account creation :

Activity1: CreatingDeveloperAccount:

Creating a developer org in salesforce.

1. Go to https://developer.salesforce.com/signup
2. On the sign up form, enter the following details :

    1) First name & Last name
    2) Email
    3) Role : Developer
    4) Company : College or Company Name
    5) County : India
    6) Postal Code : pin code
    7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format : username@organization.com
Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

Milestone 2 - Object Creation

Activity 1 : Player Object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2.Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3.On the Object Manager page, click Create | Custom Object.

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
    - **Label** : Player
    - **Plural Label** : Players
    - Enter Record Name Label and Format
        Record Name : Player Name
        Data Type **:** Text
    - **In Optional features :** check the boxes for Allow Reports | Allow Activities | Track Field History.
    - **Search Status :** check the box for Allow Search.
    - Save

Activity 2 : Match Performance Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
    - **Label** : Match Performance
    - **Plural Label** : Match Performances
    - Enter Record Name Label and Format
        Record Name : Customer Account Name
        Data Type **:** Text
    - **In Optional features :** check the boxes for Allow Reports | Allow Activities | Track Field History.
    - **Search Status :** check the box for Allow Search.
    - Save.

14. Data Type :**Master-DetailRelationship**
    Related To : Player
    Field Label : Player
    Field Name : Auto Populates
    Click on Next → Next → Save.

Milestone 6 : Roll-up Summary

Activity 1 : Create Roll-up Summary for Player object.

Note :- Roll-up Summary can only be created on parent object in Master- Detail Relationship.

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist. Click Next,
6. Choose a data type as **Roll-up Summary**. Click Next.
    Field Label: Matches Played
    Field Name : Auto Populates
    Summarized Object : Match Performances
    Select Roll-up Type : COUNT

    Filter Criteria : All records should be included in the calculation.
    Click on Next → Next → Save and new.

    - Data Type : Roll-up Summary
      Field Label: Number of 50's
      Field Name : Auto Populates
      Summarized Object : Match Performances
      Select Roll-up Type : COUNT
      Filter Criteria : Only records meeting certain criteria should be included in

Field Label: Total Overs
Field Name : Auto Populates
Summarized Object : Match Performances
Select Roll-up Type : SUM
Field To Aggregate : Overs Bowled
Filter Criteria : All records should be included in the calculation.
Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Total Wickets
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : SUM
  Field To Aggregate : Wickets Taken
  Filter Criteria : All records should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Total Stumpings
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : SUM
  Field To Aggregate : Stumpings
  Filter Criteria : All records should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary

Field Label: Total Catches
Field Name : Auto Populates
Summarized Object : Match Performances
Select Roll-up Type : SUM
Field To Aggregate : Catches
Filter Criteria : All records should be included in the calculation.
Click on Next → Next → Save and new.

Milestone 7 : Flows

Activity 1 : Screen Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

2.Select Screen Flow and click Create.

3. Click (+) Icon on the flow builder and Select **ScreenComponent.**
   Label : Players screen
   API : Players_screen
   Select the **Picklist** component and place it on the screen.
   Label : Team
   API : Team
   From Component Pane on the left side select **ComponentType** : Picklist
   Data Type : Text
   Choice : Click New Choice Resources
   Resource Type : Picklist Choice Set

   API Name : Team
   Object : Player
   Data Type : Picklist
   Field : Team
   Click Done.

4. Click (+) Icon on the flow builder and Select **GetRecords Component.**
   Label : Players
   API Name : Players
   Object : Player
   Filter player records :
   Field : Team
   Operator : Equals
   Value : Click New Resource
   Resource Type : Variable
   API Name : Dynamic
   DataType : Text
   Default Value : Screen component : Team (Picklist)

Click on Next → Next → Save & New.

- Data Type : **Lookup Relationship**
  Related To : Match Performance
  Field Label : Match Performance
  Field Name : Auto Populates
  Click on Next → Next → Save.

Activity 2 : Create Custom fields for Match Performance object.

1. Data Type : **Text**
   Field Label: Match Performance Name
   Field Name : Auto Populates
   Length : 80
   Click on Next → Next → Save and new.

2. Data Type : **Checkbox**
   Field Label: Player of the Match
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

3. Data Type : **Picklist**
   Field Label: Match Result
   Field Name : Auto Populates
   Value : Enter value, with each value separated by a new line
   WON
   LOST
   DRAW
   Click on Next → Next → Save and new.

4. Data Type : **Number**
   Field Label: Runs Scored
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

5. Data Type : **Number**
   Field Label: Balls Faced
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

Value : Enter value, with each value separated by a new line.

Australia
Bangladesh
England
India
New Zealand
Pakistan
South Africa
Sri Lanka
West Indies
Afghanistan
Zimbabwe
Ireland
Scotland
Netherlands
United Arab Emirates
Nepal
United States ofAmerica

Click on Next → Next → Save and new.

- Data Type : **Picklist**
  Field Label : Team
  Field Name : Auto Populates
  Value : Enter value, with each value separated by a new line

  Chennai Super Kings (CSK)
  Delhi Capitals (DC)
  Kolkata Knight Riders (KKR)
  Mumbai Indians (MI)
  Punjab Kings (PBKS)
  Rajasthan Royals (RR)
  Royal Challengers Bangalore (RCB)
  Sunrisers Hyderabad (SRH)
  Gujarat Titans (GT)
  Lucknow SuperGiants (LSG)

- Data Type : **Formula**
  Field Label : AVG Score
  Field Name : Auto Populates
  Formula Return : **Number**
  Formula : IF(

```
Matches_Played__c > 0,
Total_Runs__c / Matches_Played__c ,
0
)
```

Field Label:ProfilePicture
Field Name:AutoPopulates
Click on Next→Next→ Save and new.

- Data Type:**Date**
  Field Label:DateofBirth
  Field Name:AutoPopulates
  Click on Next→Next→ Save and new.

- Data Type:**Picklist**

Field Label:Role
Field Name:AutoPopulates
Value : Entervalue,with each value separated by a new line.

Batsman
Bowler
Batsman&Wicket Keeper
All Rounder

- Data Type:**Picklist**
  Field Label:BattingStyle
  Field Name:AutoPopulates
  Value : Entervalue,with each value separated by a new line.
  Right-Handed
  Left-Handed
  Click on Next → Next→ Save and new.

- Data Type : **Picklist**
  Field Label : Bowling Style
  Field Name : Auto Populates
  Value : Enter value, with each value separated by a new line.
  Right-Arm Fast
  Left-Arm Fast
  Right-Arm Medium
  Left-Arm Medium
  Right-Arm Spin
  Left-Arm Spin
  Click on Next → Next → Save and new.

- Data Type : **Picklist**
  Field Label : Nationality
  Field Name : Auto Populates

- Centralized database
- Live statistics Secure
- access Scalable
- design Easy reporting
-

4.3 Solution Architecture

Architecture Layers

- Presentation Layer (Lightning UI)
- Application Layer (Flows, Logic)
- Data Layer (Objects)
- Analytics Layer (Reports)

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile-based execution
- Object creation → automation → reporting
- Sprint-wise development

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the CRICKSTATS system.	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	Member2
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	Member3

Match Performances
Reports
Dashboards

6. To Add User Profiles : System Administrator
7. Click Save & Finish.

Milestone 5 : Fields & Relationships

Activity 1 : Create Custom fields for Player object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.
6. Next, choose a data type as Text. Choosing a data type helps you format the field input.
7. Click on next.

8. Data Type : **Text**
Field Label: Player Name
Field Name : Auto Populates
Length : 50
Click on Next → Next → Save and new.

9. Repeat the Same steps for remaining fields

- Data Type : **Text**
  Field Label: Player Number
  Field Name : Auto Populates
  Length : 3
  Click on Next → Next → Save and new.

- Data Type : **Rich Text Area**

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRICKSTATS system effectively addresses the key challenges faced in traditional cricket performance management. Earlier, most player and match data were maintained using manual records, which were time-consuming and prone to errors. This issue has been resolved by implementing an automated system through Salesforce, which ensures accurate and efficient data entry and management. The problem of data loss, caused by improper storage and lack of backups, is overcome by using secure cloud storage that safely stores all information and allows easy retrieval. Poor analysis of player performance, due to scattered and unorganized data, is addressed through interactive dashboards that present clear visual insights and reports. Additionally, delays in accessing performance information and generating reports are eliminated by providing real-time reporting features, enabling users to make faster and more informed decisions. Thus, CRICKSTATS successfully bridges the gap between existing problems and modern technological solutions.

4.2 Proposed Solution

Description

CRICKSTATS provides:

- Custom objects (Player, Match Performance)
- Master-detail relationships
- Roll-up summaries
- Lightning App
- Automated flows
- Interactive dashboards

Key Features

5. Click (+) Icon on the flow builder and Select **Screen Component.**
   Label : Player_info
   APIName : Player_info
   From Component Pane on the left side select **Component Type :** Data table
   APIName : Player_info_table
   Label : Data Table
   Configure DataSource : Source Collection : Players from players (Player__c)

   InConfigure Columns : Addall therequired Columns
   Profile Picture | Player Name | Total Runs | AVG Score | Batting Style | Bowling Style | Matches Played | Number of 50's | Number of 100's
   Click Done.

   Click Save.
   Flow Label : Player Flow
   Flow API Name : Player_Flow

Activity 2 : Flow on Home Page

1. On your CRICKSTATS Application on the top right of the Navigation Bar click on **Personalize your nav bar icon (Pencil Icon)** and Add Home Page and click Save.
2. Remove all other components and Add **FLOW** component from the standard components on the left side.
3. **Flow** : Players Flow
4. Click **Save** and **Activation**.
5. Click on **App Default** and select **Assign to Apps.**
6. Select **CRICKSTAS** App and Click **Next** and then click **Save**.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning user interface to verify the correct functioning of all implemented features in the CRICKSTATS system. These include record creation for Player and Match Performance objects; validation rule checks for mandatory fields, score limits, and input constraints; verification of record type behavior for Domestic and International match categories; and flow execution for automatic updating of player statistics and data consistency. The

the calculation.
Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Number of 100's
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : COUNT
  Filter Criteria : Only records meeting certain criteria should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Total 4's
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : SUM
  Field To Aggregate : Fours
  Filter Criteria : All records should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Total 6's
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : SUM
  Field To Aggregate : Sixes
  Filter Criteria : All records should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary
  Field Label: Total Runs
  Field Name : Auto Populates
  Summarized Object : Match Performances
  Select Roll-up Type : SUM
  Field To Aggregate : Runs Scored
  Filter Criteria : All records should be included in the calculation.
  Click on Next → Next → Save and new.

- Data Type : Roll-up Summary

functionality of roll-up summary fields was also tested to ensure accurate calculation of total runs, wickets, averages, and performance metrics.

In addition, system performance was evaluated by monitoring response time during data entry, report generation, and dashboard loading. The application was tested under multiple user interactions to ensure stable performance without delays. Screenshots of generated reports and interactive dashboards were documented to confirm accurate data visualization, real-time updates, and reliable performance tracking. These testing activities ensured that the CRICKSTATS platform met both functional and performance requirements and was ready for deployment.

NOTE : Enter some records in the Player Object and Match Performance Object to get the results.

1. Select one Team from the Picklist and Click **Next**.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized system
- Real-time analytics
- Secure platform
- Scalable design
- Reduced manual work

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Conclusion:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

The project demonstrates practical application of SDLC, Agile methodology, and CRM-based development.

10. FUTURE SCOPE

- Mobile application integration
- AI-based performance prediction
- Video analysis integration
- Player ranking system
- Public statistics portal Multi-
- league support

11. APPENDIX

- Salesforce Objects & Fields
- Manual match statistics
- Flow Configurations

Thank You

6. Data Type : **Number**
   Field Label: Fours
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

7. Data Type : **Number**
   Field Label: Sixes
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

8. Data Type : **Number**
   Field Label: Overs Bowled
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

9. Data Type : **Number**
   Field Label: Wickets Taken
   Field Name : Auto Populates
   Click on Next → Next → Save and new.

10. Data Type : **Number**
    Field Label: Runs Conceded
    Field Name : Auto Populates
    Click on Next → Next → Save and new.

11. Data Type : **Number**
    Field Label: Maiden Overs
    Field Name : Auto Populates
    Click on Next → Next → Save and new.

12. Data Type : **Number**
    Field Label: Stumpings
    Field Name : Auto Populates
    Click on Next → Next → Save and new

13. Data Type : **Number**
    Field Label: Catches
    Field Name : Auto Populates
    Click on Next → Next → Save and new.

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)
2. Select Object(Player) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations ischecked.
4. Click save.
5. Repeat the same steps for Match Performances.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.
2. Fill the app name in app details and branding as follow
   App Name : CRICKSTATS
   Developer Name : Auto Populates
   Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default.
   Then click Next.

3. In App options
   Navigation style : Standard navigation
   Setup experience : setup
   Supporters form factors : Desktop and phone
   Then click Next

4. In Utility items
   Utility Bar alignment : Default
   Then click Next.

5. Navigation items
   Select the created Custom Objects and required standard objects
   - Players

The system should function correctly without failure and store data accurately.
Requirements

- No data loss
- Automatic backups
- Error handling
- System stability

Example:

If a manager enters match statistics and loses internet connection, the data should be saved automatically when reconnected.

Salesforce cloud backup ensures recovery in case of system failure.

NFR-4: Performance

The system should respond quickly and handle large volumes of data efficiently.
Requirements

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal response time

Example:

When an analyst generates a performance report for 100+ players, the report should load within 2–3 seconds.

Optimized Salesforce queries and caching improve response speed.

NFR-5: Availability

The system should be accessible whenever users need it.
Requirements

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Analytics	Reports & Dashboards
Automation	Salesforce Flows
Backend	Salesforce Objects
Database	Salesforce Cloud

Interactive Cricket Player Performance Analysis System (CRICKSTATS)

3.REQUIREMENT ANALYSIS PHASE

User Journey Stages:

- ☐ User Registration / Login
- ☐ Select Cricket Player
- ☐ Enter Match Details
- ☐ Add Player Performance
- ☐ View Performance Statistics
- ☐ Compare Player Results
- ☐ Generate Performance Report
- ☐ Make Team Selection Decisions

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry
FR-3	Dashboard Generation
FR-4	Report Creation
FR-5	Flow Automation

Non-Functional Requirements (NFRs) – CRICKSTATS

NFR-1: Usability

The system shouldbe easy to understand and use by coaches, managers, analysts, and admins without requiring technical training.

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

Problem Statement (PS)		I am (Customer)	I'm trying to	But	Bacause	Which makes me feel
PS-1		A cricket coach	Monitor player performance	It is difficult to view all statistics together	Player records are maintained separately	Confused and time-consuming
PS-2		A team manager	Update player match details	Manual data entry takes more time	Player records are maintained separately	Trired and inefficient
PS-3		A sports analyst	Compare players' performance	Finding previous match records is difficult	Data is not organized in one place	Difficult to analyze
PS-4		Acricket administrator	Maintain accurate player records	Errors may occur while entering data	Record are handled manually	Worried about data accuracy
PS-5		Acoach	Generate player performance reports	Preparing reports manually takes time	There is no centralized performance system	Frustrated and delayed

2.2 Empathy Map Canvas

Target Users

- Team Managers
- Coaches
- Analysts
- Salesforce Admins

Empathy Analysis

Aspect	Description

- **Think & Feel:** Need accurate data, better insights
- **Hear:** Feedback from management
- **See:** Multiple data sources
- **Say & Do:** Collect statistics manually
- **Pain:** Dataerrors, delays
- **Gain:** Fasterdecisions, automation
